Introduction

Internal and External Audit in IIMR

Throughout the year, both internal and external financial audits are conducted to ensure transparency and compliance. Internal audits are often carried out by an organization's internal audit team, reviewing financial processes and controls within the entity. External audits are typically performed by independent audit firms to provide an unbiased evaluation.

Internal audits focus on areas like financial transactions, internal controls, and risk management. External audits, conducted by certified public accountants or audit firms, verify financial statements for accuracy and compliance with accounting standards.
