Nifty 50 hits fresh record as foreign flows stabilize, earnings steady

Reuters; 21 November 2025

Private-sector growth at six-month low on softer manufacturing, resilient services

India's composite flash PMI dipped to 59.9 in November from 60.4 in October, a six month low, as manufacturing eased to a nine-month trough while services improved. Firms cited heavy rains and competitive global pricing for softer orders, with hiring and output-price inflation cooling.

November macro watch: CPI, IIP, PMI and fiscal math in focus

Investors tracked a dense data slate—retail inflation, industrial output, flash/final PMIs, and fiscal deficit prints—to gauge growth-inflation dynamics and policy glide path into December.

### **Green MBA: The Rise of Sustainable Business Leadership**

The business world is rapidly shifting as climate change, resource depletion, and social issues push companies to adopt ethical and sustainable practices. Organizations are now expected to balance profit with environmental responsibility and social impact. This has created a strong need for professionals who understand sustainability along with business strategy. The Green MBA fulfills this need by combining traditional management education with environmental management, ESG (Environmental, Social, Governance) principles, and ethical leadership.

Traditional MBA programs often overlook crucial areas like climate risk, carbon accounting, circular economy models, and green supply chains. With stricter sustainability norms worldwide and in India—such as mandatory CSR, SEBI's BRSR reporting, waste-management laws, and the national goal of carbon neutrality by 2070—businesses now require sustainability-skilled managers. The Green MBA bridges this gap by training students in resource efficiency, environmental policies, sustainable innovation, and responsible decision-making,

Research strongly supports integrating sustainability into management studies. Concepts like John Elkington's Triple Bottom Line (People, Planet, Profit) show that long-term success depends not just on financial growth but also on environmental and social performance. Companies with strong ESG practices are more resilient and attract better investments, encouraging universities to redesign business curricula.

Globally, prestigious institutions such as Yale, Duke, Presidio Graduate School, and IE Business School offer sustainability-focused MBA programs. These programs emphasize climate strategy, renewable energy, sustainable finance, and green operations.

In India, interest is growing rapidly. IIMs, BITS Pilani, and TISS Mumbai offer sustainability-oriented programs. Meanwhile, companies like Tata, Infosys, ITC, Mahindra, and Wipro are adopting strong sustainability practices, increasing demand for trained professionals.

The future scope is highly promising. Career roles include ESG Analyst, CSR Manager, Climate Consultant, Renewable Energy Project Manager, Sustainability Strategist, and Green Supply Chain Leader.

In conclusion, the Green MBA is a modern and essential program that prepares leaders for a sustainability-driven future. It aligns with India's development goals and equips graduates with skills for meaningful, responsible, and future-ready careers.

# Economical & Financial Indicators - November 2025

Indicator	Latest Value / Trend	Remarks / Insight
GDP Growth Rate (India)	6.8% (FY26 Projection)	RBI revised India's GDP growth forecast for FY 2025–26 upwards to 6.8% from earlier estimate of 6.5%.
CPI Inflation Rate	2.1% (August 2025)	Headline inflation showed significant moderation, dropping to 2.1% in August 2025.
Repo Rate (RBI)	5.50%	RBI kept the policy repo rate unchanged at 5.50% in its October 2025 review.
Sensex & Nifty	Sensex ↑ 1.0% - Nifty ↑ 1.0% (October)	Markets showed positive movement in October, reflecting investor optimism.
USD–INR Exchange Rate	88.36 (Average October 2025)	The exchange rate fluctuated between ₹87.74 and ₹88.87 during October 2025.
Exports & Imports	Exports: \$220.12 bn - Imports: \$375.11 bn (Apr–Sep 2025)	Merchandise trade deficit widened due to higher imports.
Crude Oil (Brent)	\$61.50 per barrel (October 2025)	Prices fell to a five-month low amid concerns about a global crude oil surplus.
Unemployment Rate (India)	6.9% (September 2025, CMIE)	Slight rise observed, with urban employment picking up.
PMI – Manufacturing	56.9 (October 2025)	Indicates continued expansion in business activity.

## Summary:

India’s economic indicators for November 2025 show a robust growth outlook, exceptionally low inflation, and resilient equity markets. The rupee remained steady, while gold prices hit new highs. Manufacturing continued expanding, and the labour market remained stable.

### IIMR Students' participation in the "Women Mock Parliament" hosted by IMA

The Indore Management Association (IMA) hosted a Women Mock Parliament on 11th and 12th, November 2025, providing IIMR students with a platform to debate and understand women's empowerment issues. Participants were divided into ruling and opposition parties and addressed challenges such as gender inequality, safety, and sexual harassment, they also presented the "Women Workforce Participation and Empowerment Bill, 2025" among other legislative discussions. The event aimed to foster leadership and critical thinking on governance and social issues.

### Industry visit to Tata International Limited, Dewas

On November 20, 2025, IIMR students visited Tata International Limited (TIL) in Dewas, an industry leader in the global leather trade and distribution. The visit offered practical insights into large-scale manufacturing processes, from raw material sourcing to quality control for major brands like Hyundai and Zara. Students observed TIL's strong commitment to operational efficiency and environmental sustainability, particularly its advanced waste treatment and recycling systems.

## Industry visit to JSW Steel Coated Products Limited

On November 20, 2025, IIMR students visited JSW Steel Coated Products Limited, gaining practical exposure to modern, large-scale steel manufacturing operations. The visit highlighted how JSW utilizes advanced technology to produce specialized steel for the automotive and construction sectors, focusing heavily on operational efficiency, supply chain logistics, and the company's commitment to achieving net-zero carbon emissions by 2050. This experience effectively linked academic management principles with the practical realities of India's heavy industry sector.

## IIST Group of Institutions Ties Up With Top Hospitals of Indore, Elevating Campus Healthcare

IIST Group of Institutions signed an MoU with Vishesh Jupiter and Choithram Hospital, further strengthening healthcare support for the entire campus community. This association aims to bring quality medical care for students, parents, employees, and their families, with special reductions on consultations, tests, and treatments. Guided by the vision of Hon'ble Group Advisor Shri Arun S. Bhatnagar Sir, the initiative highlights the institution's commitment to overall well-being and a warm, caring environment for everyone connected with the campus.

## IIST Group of Institutions organized its flagship events; Apratim Pragya Pratispardha and Apratim Sports League

The Annual Inter-School Fest, “Apratim Pragya: Pratispardha & Inter-School Sports League 2025,” was organized from 3rd to 5th November 2025 at the Indore Institute of Science and Technology campus. Apratim Pragya: Pratispardha & Inter-School Sports League 2025 is an initiative aimed at discovering and celebrating the hidden talents of school students across Madhya Pradesh. This unique platform fosters creativity, intellect, innovation, and sportsmanship, while bridging the gap between school education and higher learning. Under the aegis, Indore Institute of Management and Research organized Interschool English and Hindi Debate Competition on 3rd November 2025.

## Expert Session during the Management Development Programme conducted by Dr. Suyash Jhawar Sir Principal, IIMR
